

CUSTOMER STORY

# How King University saves time by harnessing the full power of Greenshades.

## Overview

King University is a Presbyterian-affiliated Christian college dedicated to the integration of rigorous academics and faith. The University establishes students in a robust liberal arts foundation and offers specialization in a contemporary range of degrees.

## Challenges

King University needed to track PTO, send paystubs and deliver W-2 forms to employees electronically.

- They wanted a new, modern system that would easily integrate with their current systems while not disrupting the flow of day-to-day operations.
- There was also a desire to streamline the payroll process.

## Solutions

King uses the following Greenshades products:

- Core Reporting
- GreenEmployee
- GreenEmployee Advanced Timesheets
- Tax Filing Center

King University now processes payroll in one day using Greenshades when it previously took multiple days just to calculate time, check balances, and import data.

## Results

- Thousands of dollars saved by offering paperless forms and pay remittances.
- Average of 4 hours saved per pay period on statutory compliance.
- Formerly manual processes like calculating time, check balances, and importing data, are now automated.

“

Greenshades is affordable and user-friendly with a customer support team that is very responsive and knowledgeable.
