# Greenshades

Payroll Tax Services

Greenshades automatically calculates payroll taxes to save time and money for your team.

How it Works

Greenshades tax service is the easiest way to file and pay your payroll taxes. Instead of tracking deadlines yourself, we will create the optimal payment and filing schedule based on your company's payroll. Our online portal keeps you in control every step of the way by:

- ✅ **Tracking upcoming deadlines**
- ✅ **Viewing historical information**
- ✅ **Allowing you to schedule payments or filings in advance**

Payroll Tax Service

The Core Module of our Payroll Tax Service includes payments for Federal Income Tax Withholding (FIT), Social Security, Medicare, and Federal Unemployment (FUTA). We will also submit returns for Federal W-2s, 941s, 940s, and New Hire reports.

Manage Tax Filings Across State Lines

Our State Packages support the calculation of tax deadlines, generating electronic files, and automatic submission of both payments and filings for State Income Tax Withholding (SIT) and State Unemployment Insurance (SUTA or SUI).

W-2 Reporting Made Simple

Greenshades Local W-2 module creates the local withholding reports and payment vouchers for thousands of localities throughout the country. Through a direct integration, the module will use the local tax codes in your accounting system to determine wage and tax information as well as track deadlines for these filings and payments, making even the hardest localities easy to manage.
